Children warmly
welcomed!**

Faith Centered Preschool Program

Moral values and the development of social skills form the basis of the program. The curriculum focuses on religion, language arts and mathematics. Science, social studies, art and music are integrated across the curriculum. Learning is taught through art and play. While children are having fun, they are learning! Physical education concentrates on the development of gross and fine motor skills. Students recognize that each and every one of them is special and has many talents. They realize that God loves them.
